

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	29 September 2026	Team ID	AI WeatherWise
Project Name	AI WeatherWise	Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed AI WeatherWise solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Weather Data Access	Fetch current weather data Retrieve location-based weather information Display temperature, humidity, wind speed and conditions
FR-2	Weather Forecast	Provide daily forecasts Provide short-term/hourly forecast information Display rain and weather-condition predictions
FR-3	AI-Based Weather Insights	Generate easy-to-understand weather summaries Identify important weather changes Provide personalized weather suggestions based on forecast conditions
FR-4	User Location & Search	Use selected/searchable locations Allow users to change locations Show weather information for the selected location

Non-functional Requirements:

Following are the non-functional requirements of the proposed AI WeatherWise solution.

Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Non-Functional Requirement' 'frags': [ParaFrag(__tag__='para', bold=1, fontName='Helvetica-Bold', fontSize=7.5, greek=0, italic=0, link=[], rise=0, text='Non-Functional Requirement', textColor=Color(0,0,0,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph	Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Non-Functional Requirement' 'frags': [ParaFrag(__tag__='para', bold=1, fontName='Helvetica-Bold', fontSize=7.5, greek=0, italic=0, link=[], rise=0, text='Non-Functional Requirement', textColor=Color(0,0,0,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph	Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Description' 'frags': [ParaFrag(__tag__='para', bold=1, fontName='Helvetica-Bold', fontSize=7.5, greek=0, italic=0, link=[], rise=0, text='Description', textColor=Color(0,0,0,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph
NFR-1	Usability	Simple, clear and user-friendly interface for viewing weather information.
NFR-2	Security	Protect user data and securely handle location and application information.
NFR-3	Reliability	Provide consistent weather information and handle service failures gracefully.
NFR-4	Performance	Load weather data and forecasts quickly with minimal response time.
NFR-5	Availability	Weather information should be accessible whenever the application service is available.
NFR-6	Scalability	Support increasing users, locations and weather-data requests without major performance loss.
