### Problem - Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

### Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ Understand the existing situation in order to improve it for your target group.

### AI WeatherWise - Problem-Solution Fit

|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1. CUSTOMER SEGMENT(S)</b><br>Students, working professionals, commuters, travellers, farmers and other users who need quick and understandable weather information for daily planning.                                              | <b>2. JOBS-TO-BE-DONE / PROBLEMS</b><br>Users need to know current weather, temperature and forecast conditions so they can plan travel, outdoor activities, work and daily routines without checking multiple sources.                            |
| <b>3. TRIGGERS</b><br>Sudden weather changes, rain or storm alerts, travel plans, outdoor activities, daily commuting, agricultural activities and the need to check tomorrow's or upcoming weather.                                    | <b>4. EMOTIONS: BEFORE / AFTER</b><br>Before: uncertain, confused or concerned about changing weather conditions. After: informed, prepared and more confident about making weather-related decisions.                                             |
| <b>5. AVAILABLE SOLUTIONS</b><br>Weather websites, mobile weather apps, search engines and general forecast services are available, but users may need to switch between sources or interpret technical weather information themselves. | <b>6. CUSTOMER CONSTRAINTS</b><br>Limited time, difficulty interpreting technical forecast details, unreliable or inconsistent information from different sources, limited internet access in some situations and the need for simple information. |

|                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                  |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>7. BEHAVIOUR</b><br><p>Users frequently check weather before leaving home, travelling, planning outdoor activities or responding to changing conditions. They prefer quick, clear and easy-to-understand information.</p>                                           | <b>8. CHANNELS OF BEHAVIOUR</b><br><p>Online: web browsers, mobile devices, weather websites/apps and search engines. Offline: daily travel planning, workplace/school decisions, outdoor activities and conversations based on expected weather.</p>                                                                            |
| <b>9. PROBLEM ROOT CAUSE</b><br><p>Weather information can be spread across different sources and may be presented with technical details that are difficult to understand quickly. Users need one convenient place for clear, useful and timely weather insights.</p> | <b>10. YOUR SOLUTION</b><br><p>AI WeatherWise is a web-based AI-powered weather information and insights system that provides weather information in a simple, user-friendly format. It helps users understand current conditions and forecasts so they can plan activities and respond to weather changes more effectively.</p> |
