

Brainstorm & Idea Prioritization

Date: 30 September 2026
Team ID: UNM1737WeatherWise
Project Name: AI WeatherWise
Maximum Marks: 4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Team Collaboration

- Team members discussed common difficulties in accessing and understanding weather information.
- The team identified the need for a simple, user-friendly weather information system.
- Ideas were shared openly and grouped around forecasting, alerts, location and usability.

Selected Problem Statement

People often need quick and understandable weather information for their location. Existing weather information can be difficult to interpret because it may contain too much technical data. AI WeatherWise aims to present weather information clearly and provide useful AI-based insights to help users understand changing conditions.

Project Focus

AI-powered weather information, forecasts, alerts and easy-to-understand insights for users based on their selected location.

Brainstorm & Idea Prioritization

Step-2: Brainstorm, Idea Listing and Grouping

1. Weather Dashboard

Display current temperature, humidity, wind, pressure and conditions.

2. Weather Forecast

Show upcoming weather conditions and forecast information.

3. AI Weather Insights

Convert weather data into simple, understandable recommendations.

4. Location-Based Weather

Provide weather information for the user's selected location.

5. Weather Alerts

Highlight important weather changes and potentially severe conditions.

6. Responsive Interface

Make the system easy to use on desktop and mobile screens.

Step-3: Idea Prioritization

No.	Idea	User Value	Feasibility	Priority
1	Weather Dashboard	High	High	High
2	Weather Forecast	High	High	High
3	AI Weather Insights	High	Medium	High
4	Location-Based Weather	High	High	High
5	Weather Alerts	High	Medium	Medium
6	Responsive Interface	High	High	High

Prioritized Direction:

Build a simple weather dashboard with forecasts, location support and AI-generated insights.
