Customer Problem Statement Template

Create a problem statement to understand the customer's point of view. The AI WeatherWise problem statement focuses on the difficulty users face when accessing, understanding, and using weather information for everyday decisions.

Problem Statement (PS)

PS-1	I am a student, traveller, farmer, or everyday user who depends on accurate and understandable weather information. I'm trying to check the current weather and understand upcoming weather conditions so I can plan my activities safely.	But weather information can be scattered across different sources and may be difficult to understand quickly. Because users need timely, clear, location-based weather information and useful insights in one place. Which makes me feel
PS-2	I am a user who wants simple and useful weather guidance. I'm trying to make better decisions based on temperature, rainfall, wind, and other weather conditions.	But raw weather data does not always provide clear, personalized guidance. Because users need weather information to be converted into easy-to-understand insights and alerts. Which makes me feel
