EMPATHY MAP CANVAS – AI WEATHERWISE

Understanding the needs, behaviours, thoughts, feelings, challenges and expectations of people who use weather information.

SAYS	THINKS
• “I want accurate weather information.” • “I need to know if it will rain today.” • “The weather should be easy to understand.” • “I want useful weather updates for my daily activities.”	• “Can I trust this forecast?” • “Will the weather change suddenly?” • “How will the weather affect my plans?” • “I need quick and clear information instead of complicated data.”
DOES	FEELS
• Checks weather forecasts before travelling or planning activities. • Searches for current temperature and weather conditions. • Uses weather information to decide daily activities. • Looks for forecasts and alerts when weather conditions may change.	• Feels concerned when forecasts are unclear or inaccurate. • Feels confident when information is clear and timely. • Feels prepared when warned about changing weather conditions. • May feel confused by too much technical weather information.
PAINS	GAINS / NEEDS

• Inaccurate or outdated weather information. • Difficulty understanding complex forecasts. • Sudden weather changes without useful warnings. • Having to check multiple sources for weather information.	• Accurate and timely weather information. • Simple and user-friendly weather presentation. • Useful forecasts and weather insights. • Quick access to current conditions and changes. • Better preparation for travel and daily activities.

AI WeatherWise – User Perspective

AI WeatherWise is designed to provide weather information and useful insights in a clear, simple and accessible way, helping users understand weather conditions and prepare for their daily activities.

Reference format adapted from the uploaded Empathy Map Canvas template. The original template defines an empathy map as a visual tool for understanding users' behaviours, attitudes, goals and challenges. ■filecite■turn0file0■L8-L16■
